

## WHAT IS CLAIMED IS:

1. A system for providing guidance to a user in response to user entered data, the system comprising:

5 a server configured with a repository of task guidance questions and answer choices, said server capable of receiving information input from a user into the repository for upload to said server including responses to the questions, and allowing a user to download information from the repository including guidance on acceptable procedures responsive to the  
10 information input from the user;

at least one computer; and

an interface between the at least one computer and the server.

15 2. A system as claimed in claim 1 wherein access to said server is configured to be secured by user password.

3. A system as claimed in claim 1 wherein the task guidance questions and answer choices comprise intellectual property sharing task guidance.

20 4. A system as claimed in claim 1 wherein said user comprises multiple users.

5. A system as claimed in claim 4 wherein the repository is owned by an owner entity.

6. A system as claimed in claim 5 wherein the multiple users comprise users internal to the owner entity.

25 7. A system as claimed in claim 1 wherein the interface is provided by web pages that can be transmitted from the repository to the user.

8. A system as claimed in claim 8 wherein said server is configured to provide the user with links to web pages.

9. A system as claimed in claim 1 wherein said server is configured to store and download text and digital images.

10. A system as claimed in claim 1 wherein the repository comprises a database.

11. A system as claimed in claim 10 wherein the repository comprises a spreadsheet.

12. A method for providing guidance to a user in response to user entered data, the method comprising the steps of:

uploading user information to a server;

downloading from the server, web pages configured to direct a user to a repository within the server, the repository configured with task guidance questions and answer choices;

uploading user responses input into the web pages to the server; and

downloading from the server guidance on acceptable procedures responsive to the information input from the user.

13. A method as claimed in claim 12 further comprising the step of configuring the server to be secured by user password.

14. A method as claimed in claim 12 wherein the task guidance questions and answer choices comprise intellectual property sharing task guidance.

15. A method as claimed in claim 12 wherein said user comprises multiple users.

16. A method as claimed in claim 12 further comprising the step of configuring the server to store and download  
5 text and digital images.

17. A method as claimed in claim 12 wherein the repository comprises a database.

18. A method as claimed in claim 12 wherein the repository comprises a spreadsheet.
